

REACH

REGISTRATION, EVALUATION, AUTHORISATION AND RESTRICTION OF CHEMICALS

March 2026

PMG endeavours to accurately reflect the information from our manufacturers

Dear Customer,

PMG Company is fully aware of EU REACH, the European Union Regulation (EC No 1907//2006) concerning the Registration, Evaluation, Authorisation and Restriction of Chemicals that entered into force on June 1st, 2007.

PMG Company has dedicated programs and resources to deal with legislative requirements and business continuity concerns related to EU REACH.

Substances of Very High Concern (SVHC)

We are monitoring the bi-yearly additions of Substances of Very High Concern (SVHC) to the Candidate List, which is the first step of the REACH Authorisation procedure. Please visit the ECHA website for the most up to date official version of the Candidate list: <https://echa.europa.eu/candidate-list-table>

Since the European Court of Justice ruling of September 10th, 2015, PMG Company has updated all part compliance statements to show O5A (Once An Article Always An Article) calculations for REACH.

Registration of Substances

Although PMG Company is principally a supplier of articles, which do not require registration under REACH, we have completed the process of contacting our suppliers of "substances, mixtures, and articles" to ensure that all necessary registration requirements are being met. This effort extends to all materials used by PMG Company that are within the scope of REACH and with regard to the applications in which those materials are used in our products. PMG Company is also engaged in the registration process for those few substances for which we are either a manufacturer or an importer.

PMG Company has an ongoing effort to be in compliance with REACH registration obligations and therefore does not expect any disruption in the supply of materials used in PMG Company products or the supply of PMG Company products to our customers.

REACH Authorisation List (Annex XIV) and REACH Restriction List (Annex XVII)

We keep on monitoring the continuing additions of prioritised SVHC published in the Candidate List to the Authorisation List in Annex XIV. PMG Company will not manufacture, import or use these SVHC in the EU after their respective sunset dates unless an authorisation has been granted for PMG Company's use of said SVHC, or the use is exempted from authorisation. Many of PMG Company's Business Units also have programs in place to design SVHC on the Authorisation List out of their products. Please note that the Regulation still allows for articles containing SVHC to be imported into the EEA.

We also continue to monitor the ongoing amendments to Annex XVII of REACH. In many cases, Annex XVII restrictions are application specific. The substances of applicable substance restrictions are banned according to PMG Company's policy.

SCIP Notification

As off 5 January 2021, a notification obligation to the Substances of Concern In Articles as such or in complex objects (Products) (SCIP) database exists. For articles containing SVHC on the Candidate List in a concentration above 0.1% w/w that PMG Company supplies on the EU market, PMG Company will submit the required SCIP notification.

Should you have any further questions regarding the compliance status of a specific PMG Company part number, please contact sales@pmgcompanyonline.com.
